WORK EXPERIENCE

Software Engineer

Endava

12/2024 - Present

Skopje, North Macedonia

Achievements/Tasks

- Contributing to the development of a large-scale enterprise workflow platform with modern frontend technologies and micro-frontend architecture.
- Develop and maintain features within a micro-frontend architecture, ensuring modularity and scalability.
- Collaborate with cross-functional teams to improve usability, performance, and deliver high-quality user experiences.
- Create reusable components and shared UI elements, writing clean, maintainable code that accelerates development and ensures consistency across applications.

Software Engineer

Banzae

12/2022 - 12/2024

Skopje, North Macedonia

Achievements/Tasks

- Contributing to the development of multiple web applications, leveraging the latest technologies to deliver innovative solutions and enhance user experience.
- Conceptualised, designed, and developed a comprehensive Content Management System (CMS) as a core component of a cloud-based hospitality entertainment system.
- Assisted in the implementation of new technologies and best practices, increasing project efficiency by 20%.
- Developed scalable RESTful APIs using NestJS, enabling seamless data management and enhancing API performance.
- Created interactive and dynamic pages using Next.js, enhancing user engagement and experience.
- Deployed dockerized applications on AWS, managing automated CI/CD pipelines for production environments.

EDUCATION

Bachelor's Degree in Computer Science

University of Primorska

10/2019 - 09/2022

Koper, Slovenia

SKILLS

Node.js

React.js

Typescript

Java

Spring Boot

C#

.NET

Angular

Javascript

PostgreSQL

Git

Docker

AWS

Azure

Cloud Computing

PERSONAL PROJECTS

Real Time Chat App

- While trying to learn web sockets in NestJS, I have developed real time chat application which allows users to communicate with sockets. The server side is created in NestJS, with PostgreSQL database, and the client side is created in NextJS.
- Technologies used: Typescript, NestJS, NextJS
- <https://github.com/filiptodosovski/chat-app>

Sport Finder

- SportFinder is designed to help people that have a lack of players for different sports, with this information system players will have all the information about sports that are played in their town and can make connections and make new friends.
- Technologies used: PHP, CodeIgniter, JavaScript, HTML, CSS.
